Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The indicated allowability of claims 1, 3-9, 11 and 13-15 is being withdrawn in view of the rejections made in this office action. Accordingly, the finality of the office action mailed on August 9, 2005 is also being withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3-9, 11 and 13-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter that was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 1 appears to be directed to the embodiment of Figure 3. The flexible member is not secured to the pivot point in this embodiment.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1, 3-9, 11 and 13-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, it is unclear whether the pivot point is part of the body. In Figure 3, the tissue grasping claws are connected to the actuating members at a pivot point 13 that is separate from the body.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3733

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell (US 746,455).

Campbell discloses a tool having a body (E^3 , E' , E and E^2), a tissue grasping element appended to the body and having first and second opposed claws B' , first and second actuating members B^2 mated to the body and extending from openings in the body, a biasing element C extending between the first and second actuating members and a flexible member F secured at pivot point B^3 (Figures 1-3, page 1 and page 2).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wagenhauser (US 2,195,832) in view of Norton (US 6,256,923).

Wagenhauser discloses a hand tool 10 having a body (11, 12), a tissue grasping element appended to the body and having first and second opposed claws (23, 25) movable about pivot point 22 and first and second opposed actuating members (27, 28) extending from openings in the body (Figs. 1-4, page 1, lines 1-60 and page 2, lines 1-71).

Wagenhauser discloses all elements of the claimed invention except for a flexible member secured to the body of the tool.

Norton teaches providing a lanyard or "flexible member" or "string" 24 in a hole in an actuating member of a hand tool so that the tool can be attached to a support such as the wrist of a user (Fig. 2B and col. 2, lines 53-65).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided a string or "flexible member" having a portion attached to the body of the Wagenhauser tool, as taught by Norton, so that the tool can be attached to the wrist of a user.

Allowable Subject Matter

Claims 37-42 and 44-46 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
